Re: New Inspiration Broadcasting Company, Inc.  
KFIA (AM), Carmichael, California  
Facility Identification Number: 50300  
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed January 14, 2010, on behalf of New Inspiration Broadcasting Company, Inc. ("NIB"). NIB requests further extension of the special temporary authority ("STA") granted on September 15, 2008, to operate Station KFIA with parameters at variance and/or reduced power while maintaining monitor points within licensed limits.<sup>1</sup> In support of the request, NIB states that a construction project which involves the use of tall cranes is ongoing in the vicinity of the station's directional antenna system, and that the cranes cause a shift in the station's operating parameters.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem. Thus, extension of STA is warranted.

Accordingly, the request for STA IS HEREBY GRANTED. Station KFIA may operate with

---

<sup>1</sup> KFIA is licensed for operation on 710 kHz with 25 kilowatts daytime and 1 kilowatt nighttime, employing different directional antenna patterns daytime and nighttime (DA-2-U).

parameters at variance and/or reduced power while maintaining monitor points within licensed limits. It will be necessary to further reduce power or cease operation if complaints of interference are received. NIB must notify the Commission when licensed operation is restored.<sup>2</sup>

NIB must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **August 2, 2010**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller".

Charles N. Miller, Engineer  
Audio Division
